DigiProctor – Remote Proctoring Examination platform

RK University from Rajkot, Gujrat has all major disciplines in Higher Education like Medical, Pharmacy, Health science, Engineering, Agricultural as well PhD.

Doctoral Studies and Research is to support, encourage, and actively facilitate academic research in a variety of disciplines including Management, Medicine, Pharmacy, Science, and Technology.

Researchers from RK University have been successful in receiving extramural research funding from the Department of Science and Technology's Gujarat Council while several researchers from RK University have published their experimental findings in renowned journals with a Thomson-Reuters Impact Factor and with a SCImago Journal Ranking (SJR).

Conducting admission test for students who were spread across India as well as many overseas locations like Syria, Bangladesh, Nepal, Thailand, etc was not only impossible due to travel restriction imposed on account of Pandemic but also would have had bad impact on starting of course in time jeopardizing quality time that is needed for teaching & learning.

DigiProctor tool deployment was a boon for the future of our students. All the tests for the students from 8 different disciplines were done on the 12th July 2020 with complete academic integrity & values as demanded by university with highest six sigma level of reliability.

Support from all operation & technical teams was immaculate & to the highest service level.

We are thankful to Digiproctor team for developing product of the highest standard & service.

Regards
Dr. C.M Detroja
Controller of Examinations,
RK University.
